

Jaltest DATA-LINK is the newest and fastest OEM Pass Thru device in the market. It is the younger brother of Jaltest Diagnostics, therefore, you get an intuitive platform for your generic diagnostics scans, regardless if you have an OEM software or not. This means, you will be able to Read Codes, Clear Codes and get Live Measurements. As well, you can run all of the OEM Software through Jaltest DATA-LINK, making it the best of both worlds.

**GENERIC TRUCK
